

- Daily handling capacity up to 100 tons.
- Roller width is 1600mm. One divides into two with stable production.
- Automatic finishing system prevents rod block. Rod supply speed is 24 rods/min.
- Drying time: use medium and low temperature type, also accept customization.

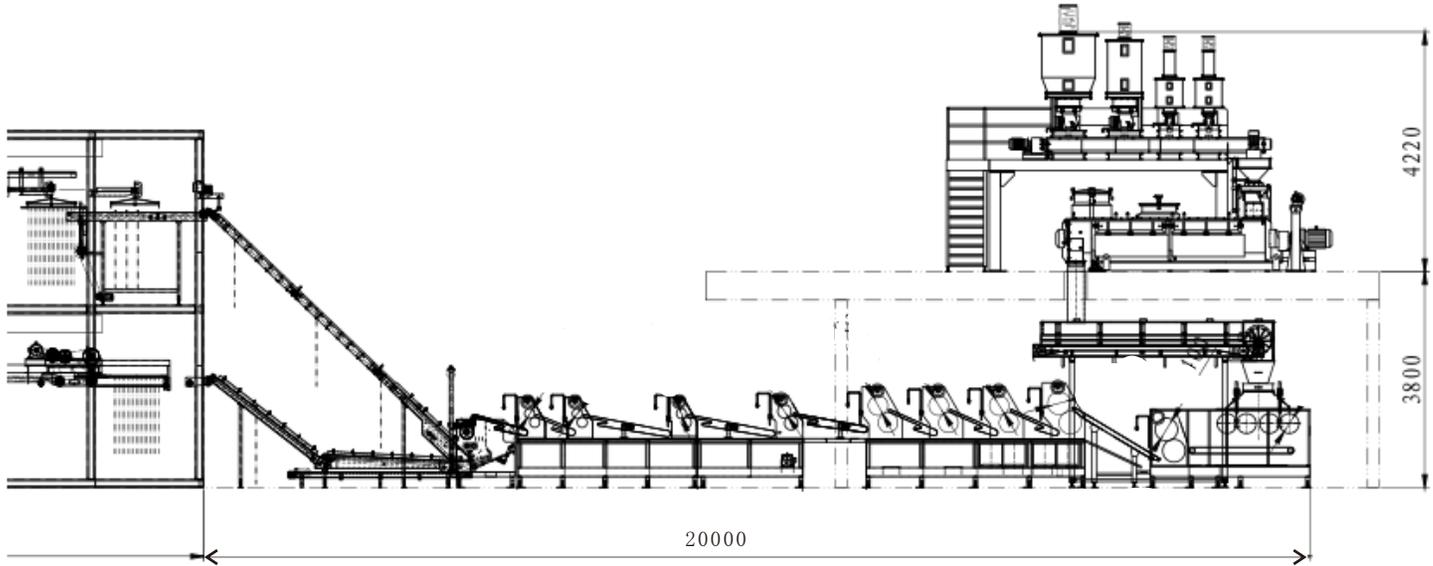

Drying system

# Dry Noodles Production Systems

# GMX-1600

GMX-1600	
Kneading type	Continuous
Roller width	1600
Drying time(h)	4.5
※ Design according to customers' requirements	

Equip with concentrated lubricating system to ensure inject lube for every lubricating spot. Simple and quick maintenance with high efficiency.

Use 100 GS magnetic rod, effectively adsorb iron materials which may enter and damage slit.

Monitor the rolling pressure and prevent metal materials entering into roller and slit to keep equipments and staff safe.
